## SECULIFE PS100 for testing patient monitors

- 3 sine, 2 square and 2 triangle selectable curves
- Indicator for residual voltage of the battery (in %)
- Patient simulation with 4 waveforms
- ECG with 30, 60, 120 and 240 BPM
- With constant QRS duration
- Leak test realisable

### Specification

The SECULIFE PS100 is a microprocessor-based patient simulator. The user has four ECG characteristics with constant QRS duration and six characteristics to test the device performance.

### ECG-Simulations

The 10 Universal Patient Lead Connectors allow for 12 lead ECG simulations with independent outputs. AHA and IEC color-coded labels are located on the face of the unit to aid in connecting the corresponding AHA and IEC Patient Leads.
