PEARL100(L)

Digital Desktop Pulse Oximeter
with ECG (Option)

The PEARL100L is a modern, competitively priced monitoring system. It is a versatile pulse oximeter that delivers quick and accurate measurements of the arterial oxygen saturation and pulse rate. The PEARL100L features an extremely well readable, crisp colour TFT screen.

The SpO₂ values and pulse rate can also be displayed as trend curves. The integrated trend memory stores more than 100 hours of patient trend data, an integrated alarm system allows for safe patient monitoring. The device has a serial interface that allows the values to be transmitted to and saved on a PC.

Also available is a version that additionally contains a one channel ECG (PEARL100).

Applications

- Monitoring patients from neonates to adults
- Monitoring of sedated patients
- Competitively priced patient monitoring
