

ingo-man® Weco

A groundbreaking advancement towards sustainable hand hygiene in the future

How can hand hygiene be an effective tool against hospital acquired infections?
Can we integrate hand hygiene into the normal daily routines of the healthcare staff?

How can compliance be increased?

How can we minimize our impact on the environment while doing this?

With our new ingo-man® Weco we provide solutions to all of these questions

Integrated counter to measure hand hygiene behaviour

Fully automated data transfer ("WiFi") to an analysis tool

Continuous monitoring of dispenser functionality, with automatic notification

Alarm function with automatic warning when bottle needs to be changed

This product is part of the OPHARDT Hygiene Monitoring System® which provides many opportunities to improve hand hygiene compliance

Green Technology: The energy required for data transfer is generated in the dispenser by the user. No additional power supply is required.
